			Sprouts & Microgreens
			Alfalfa Fenugreek Mung Bean Radish Rambo Garlic – 'Italian Pink' – suitable for SEQ
			Storing your seeds. Store seed in a sealed container in fridge or cool place - not a garden shed or garage that can reach over 40° in summer. They will die. In paper bags, they are open to the air and can take up moisture and lose viability. So, pop the envelopes into glass jars or sealed plastic containers.

Please note.

This Seed Bank list is updated often so that it is current.

With the current situation, we don't know when we will have new seeds.

Please check on this page for the date to see if the list is new.

You can collect seeds, or we will post to ROGI members, so email your request to president@rogi.com.au

We also have free seeds from ROGI Seed Savers' group. The list is also under Resources on our website.

About ROGI Seeds

ROGI sources seeds from Green Harvest in Maleny and from ROGI members who have carefully saved their own seeds. They are organic and guaranteed non-GM.

ROGI seed prices are low because:

1. The seeds are packaged in quantities usable by a home gardener before they become unviable.
2. There is no profit margin.
3. There are no labour costs.
